

Matthew Barnes

+1 (321)-205-6097 | matthew.m.barnes@wsu.edu | [LinkedIn](#) | [GitHub](#) | [Portfolio](#)

Computer Science student proficient in C, C++, and C#, with experience in full-stack and iOS development. Adaptable and determined problem-solver with leadership skills and a strong ability to work in team-based environments.

EDUCATION

Washington State University, Pullman, WA
Bachelor of Science – Computer Science
C.S. GPA: 3.3

Expected graduation date: Dec 2026

SKILLS

Languages: C, C++, C#, Python, JavaScript, HTML, CSS, Swift

Tools: Git, GitHub, Visual Studio, MS Office

Platforms: macOS, Linux/Unix, Windows

PROJECTS

Web Development | **Flick Finder – Movie Suggestion Website (JavaScript, HTML, CSS, OpenAI API)**

- Utilizes the OpenAI API to generate personalized movie recommendations based on user input.
- OpenAI API model: gpt-3.5-turbo. Designed for contextual understanding, allowing for accurate suggestions.
- Integrated TMDB API to fetch and display appropriate movie posters aligned with OpenAI API's suggestions.
- Designed a responsive UI using modern CSS.

Collaborative Software Development | **Battleship (C++, SFML)**

- Led the development of the game board, menu, and ship mechanics, ensuring seamless user experience.
- Implemented branching strategies and utilized Git & GitHub for version control, maintaining code integrity and efficient team collaboration.
- Coordinated with team members through code reviews, enhancing code quality and maintainability.

Mobile Development | **Knowhere (Swift, SwiftUI, Google Maps SDK)**

- Built an interactive geography game in SwiftUI leveraging Google Maps SDK for embedded Street View navigation and location-based challenges.
- Developed a reusable game engine supporting multiple modes with randomized location logic and map-based gameplay.
- Applied CoreLocation and Google APIs to present real-world visual clues and calculate distances between guesses and actual coordinates.
